# Some Data

**Facts:** India graduates 1.5 million engineers and 8.5 million regular graduates annually.

**Universities:** Grew from 320 in 2014 to 1,113 in 2023.

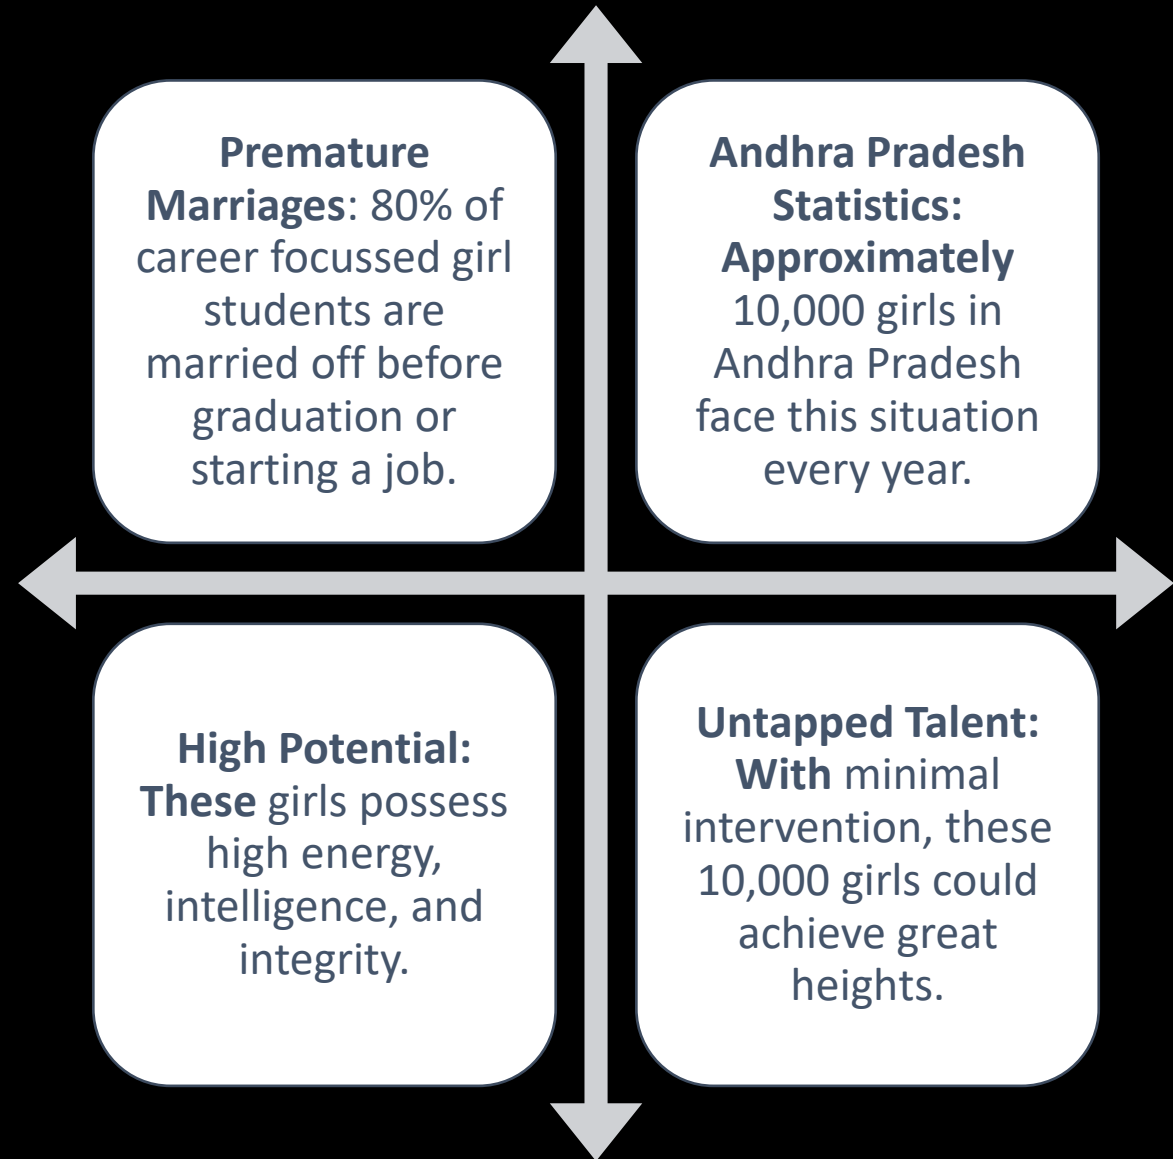

**Colleges:** Increased from 38,498 in 2014 to 43,796 in 2023.

**Employability:** Only 1 in 4 MBAs, 1 in 5 engineers, and 1 in 10 graduates are employable.

# The Issue

# JTD's Solution and it's limitations

01

**JTD's Solution:**  
Empowering girls as  
software developers

02

**Current Reach:**  
Supporting 50 girls  
annually who might  
have been married  
without intervention

03

**Potential:** Capable of  
helping 500 girls  
annually

04

**Challenge:** Manual  
approach limits  
growth

# Areas where help is Needed

- Difficulty in creating **awareness** about the scholarship program and its benefits to its audience.
- Lack of **digital** presence for student briefings and awareness campaigns.
- Need for a platform to **streamline** onboarding and automate manual tasks.
- Platform should enable efficient **hiring** of more students.
- Ability for admins to **track** student progress for informed decision-making.
- Increase student **engagement** through the platform.
- Goal to educate students to secure **jobs** while maintaining their confidence.
- Manual **sharing** of success stories or presenting them through alumni visits.
- Courses require an 18 months **commitment**, with students dropping out due to personal reasons.
- **Late** notification of dropouts makes it challenging to address issues.
- Difficulty convincing **family members** to support continued participation.
- Seeking assistance in developing a **comprehensive digital solution** to address these challenges and enhance impact.

# Impact of the Solution

- We can empower 10,000 girls by 2034 that's 10,000 families which would directly impact 100,000 people indirectly impact 1 million people in a positive way.
- A revolution where every girl who would silently give up due to lack of hope becomes a career woman and most importantly her own boss.
